MERN Stack Developer │ 3+ Years │ Full-Stack Web & Mobile Applications

---

PROFESSIONAL SUMMARY

I'm a results-driven MERN Stack Developer with 3+ years of experience in building scalable web and mobile applications. Skilled in designing clean, responsive, and user-friendly interfaces powered by robust backend solutions. Experienced in migrating legacy systems to modern JavaScript technologies, optimizing performance, and implementing real-time features. Passionate about turning business requirements into efficient digital products while continuously learning and adapting to new technologies.

WORK EXPERIENCE

Gajanan Softwares Private Limited – MERN Developer
Oct 2024 – Present │ Jaipur, Rajasthan

Product: CA Accounting Management System (MyTask)

- Handling module-based development, working on both frontend and backend.
- Collaborating with the team to rewrite legacy .NET features using modern JavaScript technologies for better performance and maintainability.
- Developing RESTful APIs, managing database schemas, and integrating front-end interfaces with backend services.
- Ensuring code quality through regular code reviews, testing, and adherence to best practices.

Triserv 360 Business Solutions Pvt. Ltd – MERN Developer
Jun 2022 – Sep 2024 │ Kanpur, Uttar Pradesh

- Led the creation of websites from start to finish, using a mix of technologies like HTML, CSS, JavaScript, React.js, Node.js
- Worked closely with different teams, turning design ideas into attractive and easy-to-use websites that adapt to different devices.
- Integrated third-party APIs, resulting in enhanced features and functionality.
- Actively took part in using Agile development methods to get projects done smoothly and efficiently.

PROJECTS

Mytask – CA Accounting Management System
Role: Full Stack Developer (MERN Stack)

Responsibilities:

- Developed frontend pages using React and integrated backend APIs built in Node.js and Express.
- Handled complete UI logic, API integration, and dynamic data rendering for assigned modules.
- Used Redux for efficient state management and applied performance optimizations using React.memo, useMemo, and API call control techniques.
- Implemented real-time calculations and ensured smooth data sync across multiple interlinked pages.

Narayani Interiors – Interior Design & Project Management Platform
Role: Full Stack Developer (MERN Stack)

Responsibilities:
- Developed a responsive frontend using React.js with reusable UI components and dynamic routing for seamless navigation.
- Built backend APIs in Node.js & Express to handle project details, client inquiries, and service management.
- Integrated form submissions with validation and backend storage to manage leads and client requests.
- Implemented image gallery and project showcase modules with optimized media loading for better performance.
- Ensured mobile-first design and cross-browser compatibility for smooth user experience.
- Applied state management using React hooks and context API for component-level data sharing.
- Focused on performance optimization with lazy loading and controlled API calls.

Datta Sai Astro & Priest Services – Astro Booking and Management System
Role: Full Stack Developer (MERN Stack)
Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js), WhatsApp Business API

Responsibilities:
- Built a full-featured web app to manage astrology events, pujas, and appointment bookings.
- Enabled users to explore and book personalized puja services and event slots.
- Integrated real-time WhatsApp notifications for both users and admins using WhatsApp Business API.
- Developed an admin dashboard to manage events, appointments, and user data.
- Implemented a complete booking status system with tracking for:
  - ▪ Scheduled ▪ Pending ▪ Completed ▪ Cancelled
- Added payment status tracking (Pending/Completed) with history logs.
- Built responsive UI/UX for mobile and desktop views.

TECHNICAL SKILLS

- **Frontend:** React.js React Native, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, Redis
- **Database:** MongoDB, Mongoose, MySQL (basic knowledge)
- **Tools:** Git, GitHub, Postman, VS Code, Jira, Swagger
- **Other:** Real-time Applications, WhatsApp Business API, Payment Integration, Third-party APIs (e.g., Panchang API), Authentication & Authorization (JWT, OAuth)
- Problem-Solving, Team Collaboration, System Design Basics, Debugging, Client Communication

---

EDUCATION

- **Skill Development Program – Full Stack Web Development**
  Masai School — 2022

- **Higher Secondary Education (12th Grade)**
  Government Inter College — 2016
